

Our Church Now Accepts Pi Donations

How to tithe using Pi Network — and how to start earning Pi today

A fellow parishioner has set up a Pi Network wallet for our church so that members of the congregation can tithe and donate using Pi — a global digital currency used by over 60 million people worldwide. You don't need to understand cryptocurrency to participate. This guide will walk you through everything in plain language.

What is Pi?

Pi is a digital currency — like online money — that you earn for free by tapping a button on your phone once a day. It was created by graduates of Stanford University and launched its open network in 2025. It costs nothing to join and you don't need any technical knowledge.

Many people compare it to Bitcoin in its early days — something that seemed unfamiliar at first but grew significantly in value over time. Whether or not that happens, Pi is already being used by millions of people to buy goods, support charities, and now — tithe to their church.

Please note: After joining Pi Network you will need to pass an identity verification step (called KYC) before you can send Pi. This process can take some time. However, you can start earning Pi right away in the meantime — so the sooner you join, the more you will have ready to donate once you are verified.

How to start earning Pi — 3 simple steps

- 1 Download the Pi Network app**
Search for 'Pi Network' in the App Store (iPhone) or Google Play Store (Android). You can also visit minepi.com on any device to get started. It is completely free.
- 2 Create your account**
Sign up with your phone number or Facebook. When asked for an invitation code, enter the code below — this connects you to our church community and boosts your mining rate.
- 3 Press the lightning bolt once a day**
Open the app and tap the mining button. That's it. You earn Pi automatically in the background. Do this every day — it only takes 5 seconds.

Your invitation code: _____

Enter this code when you sign up. It's free and helps our church community grow.

How to tithe to our church using Pi

Once you are verified and have Pi in your wallet, donating to our church is simple:

A**Open tithe.pi in the Pi Browser**

Search for our church in the directory and tap on our listing.

B**Find our wallet address**

On our church profile, scan the QR code or tap the copy button to copy our wallet address.

C**Send from your Pi wallet**

Open your Pi wallet app, tap Send, paste our address, enter your amount, and add a short note such as 'Tithe — Holy Rosary Church'. Confirm and you're done.

D**Coming soon**

We hope to simplify this donation process in the future. Thank you for your patience and generosity.

Common questions

Is Pi real money?

Yes. Pi is a live digital currency on its own blockchain since 2025. It can be exchanged for other currencies.

Do I have to spend any money?

No. Joining Pi Network and earning Pi is completely free. You never need to buy anything.

Is it safe?

Pi Network was founded by Stanford PhDs and has over 60 million members. It is widely considered legitimate.

What if I'm not tech-savvy?

The app is designed to be simple. If you can send a text message, you can use Pi Network.
