

Tithe in Pi

Church Onboarding Guide

Everything your church needs to start accepting Pi donations

Welcome!

Thank you for your interest in Tithe in Pi. This guide will walk you through everything you need to do to list your ministry and start accepting Pi donations from your congregation and beyond. It should take less than 15 minutes from start to finish.

You don't need to be technical. Just follow the steps below one at a time.

The 3 Steps to Accepting Pi Tithes

1

Register Your Church

Go to tithe.pi and tap Register. Fill in your church name, city, country, and email address. A website and description are optional but help donors find you. Once submitted, your church will appear in the directory immediately as Listed.

What you need: Church name, city, country, contact email.

2

Add Your Pi Wallet Address

Open the Pi app on your phone and go to your Wallet. Copy your wallet address. Then go to tithe.pi, tap Onboard, select your church, paste the address in and save. Your church will now show as Pi-Ready and a Donate button will appear on your profile.

What you need: Pi Network app installed, Pi wallet set up.

3

Submit Verification Proof

This is how we protect donors from fake listings. Add your Pi wallet address to your church website or official Facebook/social media page. Then tap Submit Verification Proof in the app. Our team will check and confirm within a few days. Once approved you'll show as Verified.

What you need: Access to your church website or official social media page.

Understanding Trust Levels

Your church profile shows a badge so donors know how much has been verified. Here's what each level means:

Badge	What it means
Listed	Basic info registered. Not yet verified.
Pi-Ready	Wallet added. Donors can give but verification pending.
Pending	Proof submitted. Under review by our team.

Verified	Wallet and identity independently confirmed. Recommended for donors.
Highly Verified	Additional credentials provided (charity number, KYB etc).

Common Questions

Does our church need to pay anything?

No. Listing on Tithe in Pi is completely free.

Do we need a Pi Network account?

Yes — you'll need the Pi Network app installed and a wallet set up to receive donations. If you haven't done this yet, download the Pi Network app and follow the wallet setup instructions inside it.

Who controls the donations?

You do. Donations go directly from the donor's Pi wallet to your church's Pi wallet. Tithe in Pi never touches or holds any funds.

What if our church doesn't have a website?

That's fine. You can post your Pi wallet address on your official Facebook page or any public social media instead.

How long does verification take?

Usually a few days. We'll update your status as soon as we've confirmed your proof.

Can we update our information later?

Yes. Log in to tithe.pi at any time and edit your church profile.

Ready to get started?

Visit tithe.pi and tap Register

Questions? Contact us at hello@tithe.pi

Tithe in Pi is an independent directory. It is not affiliated with Pi Network Core Team. Donations are peer-to-peer transactions.

Please give responsibly.
